

## What is SuperQuest?

Our flagship program, SuperQuest, is a highly collaborative technology training series designed specifically for K-12 teachers. Our goal is to equip educators with the skills and classroom tools to build hands-on technology learning directly into their classrooms and after school activities. Through this program, we reach over 20,000 students each year by educating and inspiring their teachers. TechStart hosts several SuperQuest weeklong summer series and two one-day conferences during the school year.

## Why Sponsor SuperQuest?

High impact educators continually learn new skills to pass on to their students and they reach hundreds of students a year! Maximize your student impact by supporting SuperQuest. Your sponsorship will help provide needed training for teachers, which they will use to teach their students critical skills they need to succeed.
